

Elevating Your Home Above Future Flooding

[Main Content](#)

Release Date:

01/29/2013 - 08:58

Under the Flood Insurance Reform Act of 2012, You Could Save More than \$90,000 over 10 Years if You Build 3 Feet above Base Flood Elevation*

Hurricane Sandy survivors with an eye toward avoiding damage from future storms can rebuild stronger and safer even in a high risk flood area. This smart rebuilding is accomplished by elevating your home to meet your community's minimum elevation regulations. You will avoid future severe weather damage. Adhering to local building codes and getting the proper permits will make your home safer and will save money on federal flood insurance. Rebuilding higher than the minimum requirement is always a wise decision.
